Configuring a Device for iNet Guardian

iNet Guardian has been tested on the following devices –

Windows 10

PreRequisites

An iNet Guardian user account must have been created, this creates the link to the file that contains the restrictions for the user. The network connection on the device in question is pointed the iNet Guardian proxy server which can apply the settings.

You will need to be logged into iNet Guardian from the device that you want to enable iNet Guardian on.

Windows Devices

There is no iNet Guardian app for Windows 10, in order to use iNet Guardian on a Windows device you will need to point your network connection to the iNet Guardian service. The instructions below are a step by step guide to do this.

Once you have created a user in iNet Guardian then from the Users menu option click on the “**Copy URL**” of the user whose device your are setting up.

Name	Status	PAC file		
<input type="text"/>	All		Filter	Refresh
bobs ipad	Active	Copy Url	✎	✕
amys iphone	Active	Copy Url	✎	✕

Once you have clicked on Copy URL a box will appear below the user list as shown below, with “URL for <user name> to be copied”

Manage Users

[+ Add Via Wizard](#)

Showing 1-2 of 2 items.

Name	Status	PAC file	Filter	Refresh
<input type="text"/>	All			
bobs ipad	Active	Copy Url	Filter	Refresh
amys iphone	Active	Copy Url	Filter	Refresh

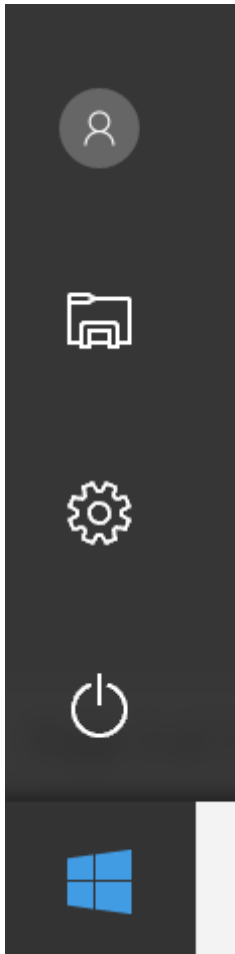

URL for bobs ipad to be copied.

Ensure the text in the box is highlighted (as above) and then with right click on the mouse and choose Copy or click on **CTRL&C** on the keyboard.

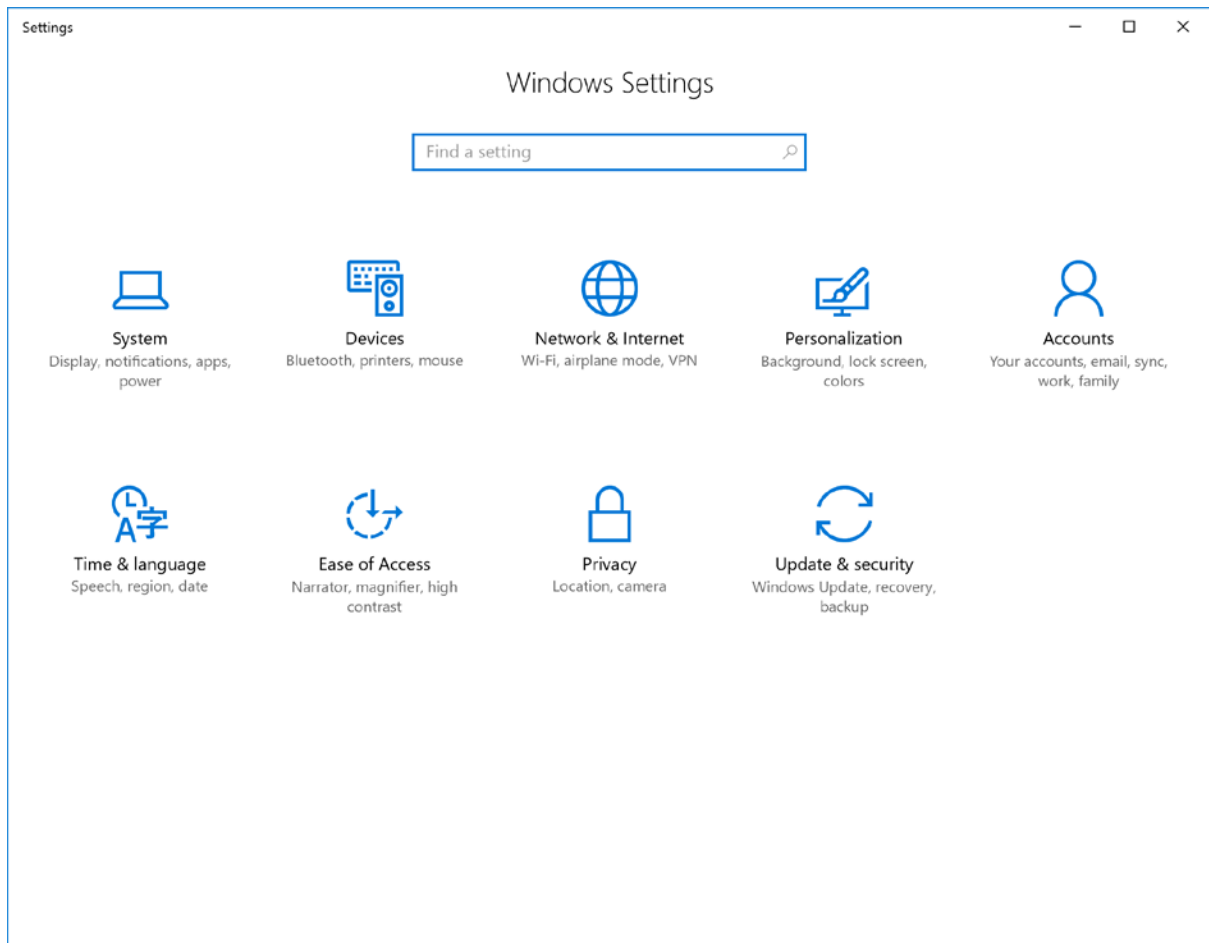

Click on the Windows icon on the tool bar (normally located in the bottom left hand corner and

The following menu will appear

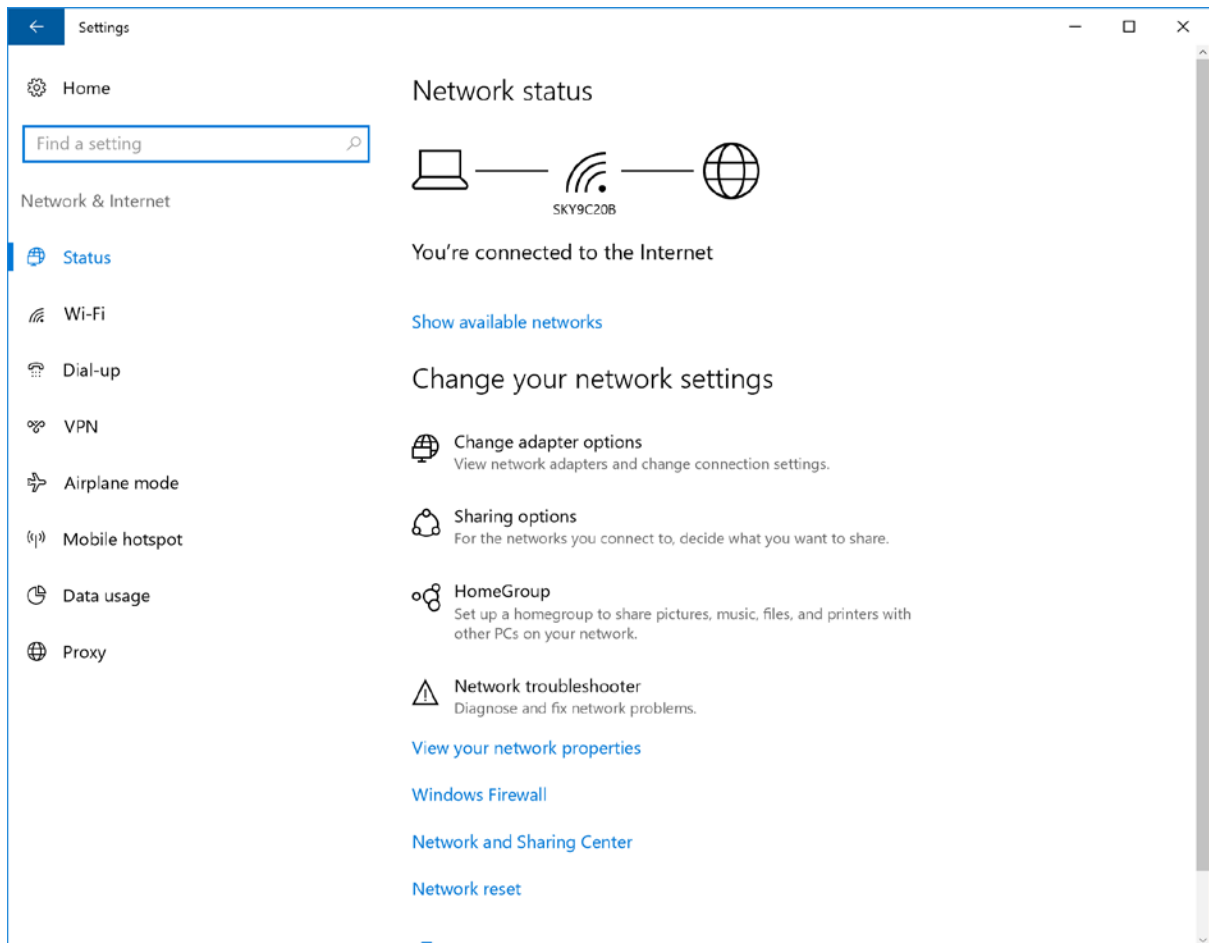

Select the icon that looks like a cog,  and you will go to Windows Settings as shown below

Click on **Network & Internet** and then from the next screen (shown below) choose **Proxy** from the

list of options in the left hand side  **Proxy**

You will need to change the Automatic Proxy options that appear on the right hand side of the window

Automatic proxy setup

Use a proxy server for Ethernet or Wi-Fi connections. These settings don't apply to VPN connections.

Automatically detect settings

Off

Use setup script

Off

Script address

Save

Click the button under “Automatically detect settings” and “Use setup script” to enable these

In the Script Address box right click and choose **Paste** from the menu that appears or click into the box with the mouse and press **CTRL&V**.

The text that you copied earlier should now appear in here.

Click on **Save**.

Click on the "X" in the top right hand corner of the window to close the window.

The device should now be configured with iNet Guardian.

Please email support@inetguardian.co.uk if you have any questions or require any support in getting iNet Guardian configured and setup. We will be only too happy to help.
