Configuring a Device for iNet Guardian

iNet Guardian has been tested on the following devices –

Apple IOS v10.2.

PreRequisites

An iNet Guardian user account must have been created, this creates the link to the file that contains the restrictions for the user. The network connection on the device in question is pointed the iNet Guardian proxy server which can apply the user settings.

Apple Devices

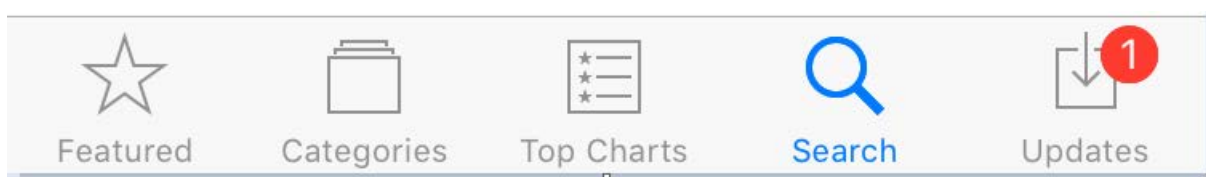

In order to configure an Apple device, you will need to install the iNet Guardian App from the iTunes App Store.

Downloading iNet Guardian app to the device –

Go to the App Store on the device (icon shown below)

Choose **Search** from the list of options across the bottom of the screen.

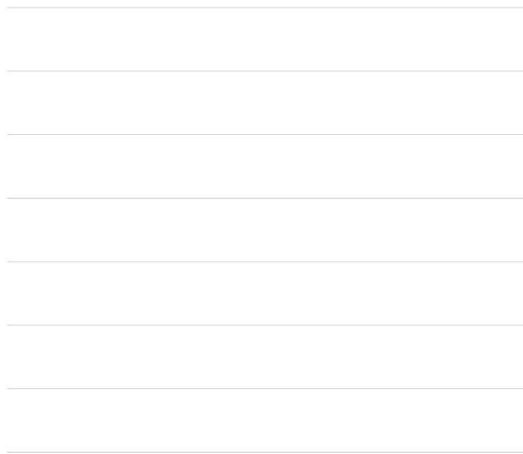

Trending

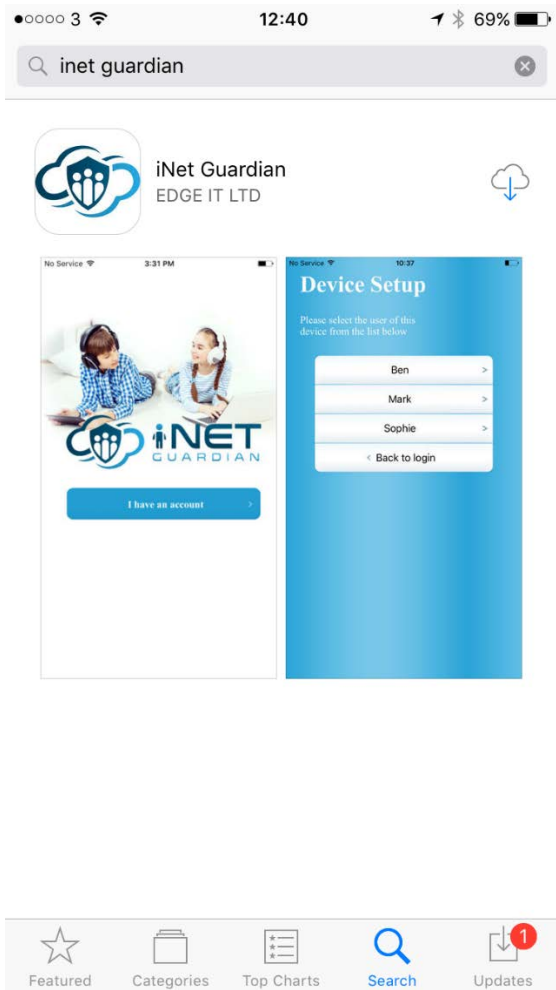

- socratic
- voodoo
- youtube kids
- who stalks my instagram
- clue
- scanner for me
- shpock
- nfl
- freeletics
- countdown

Type in iNet Guardian into the search box and click on **Search**

Click on the cloud to download the app and once its successfully downloaded it will be listed along with the other apps.

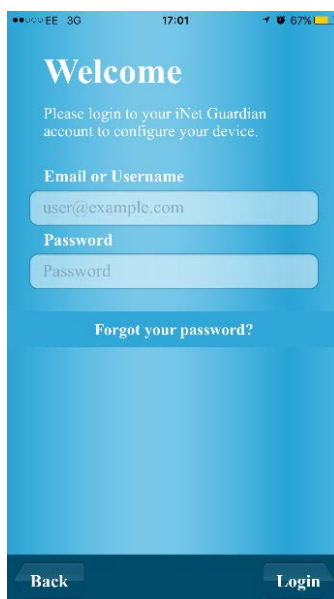

Configuring iNet Guardian app –

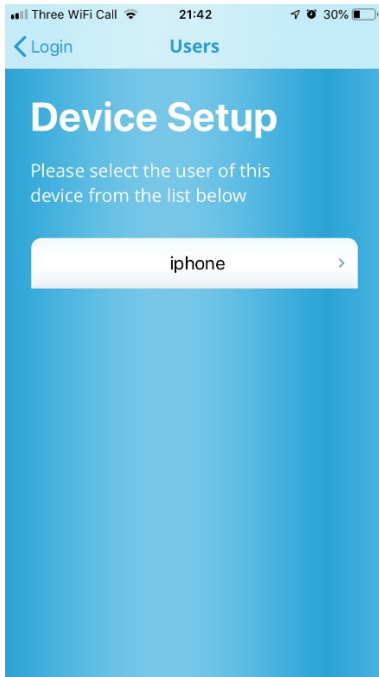

When you start the app you will be presented with the following screen

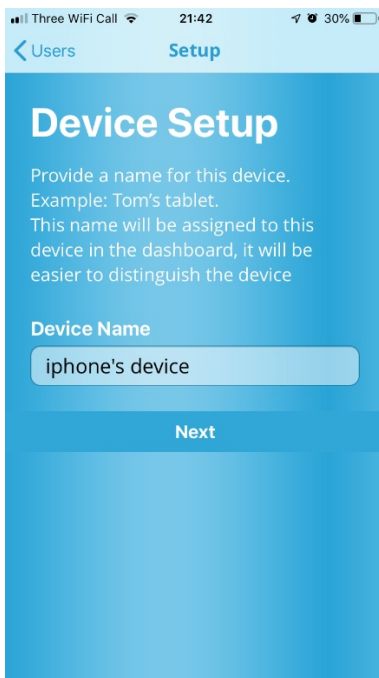

If you do not have an iNet Guardian account then go to www.inetguardian.co.uk and create an account.

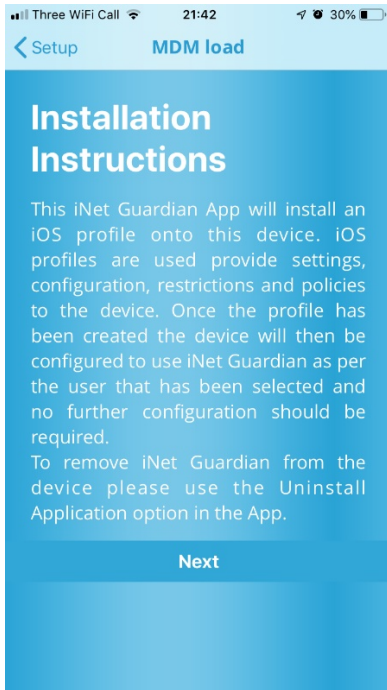

Enter your Email address or Username, then the password and click **Login**

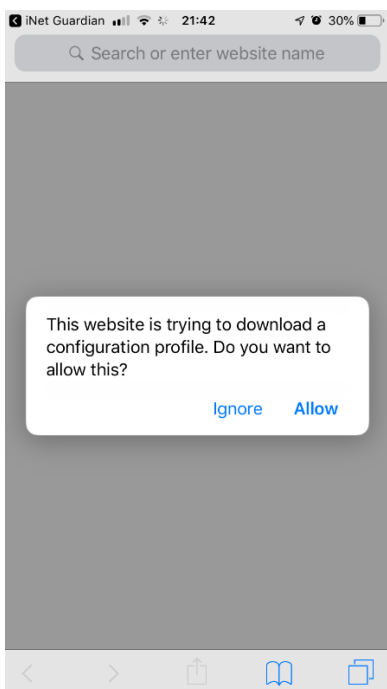

Select the user profile that you want to setup on the device. If you need to exit for any reason you can click on **Back to login**

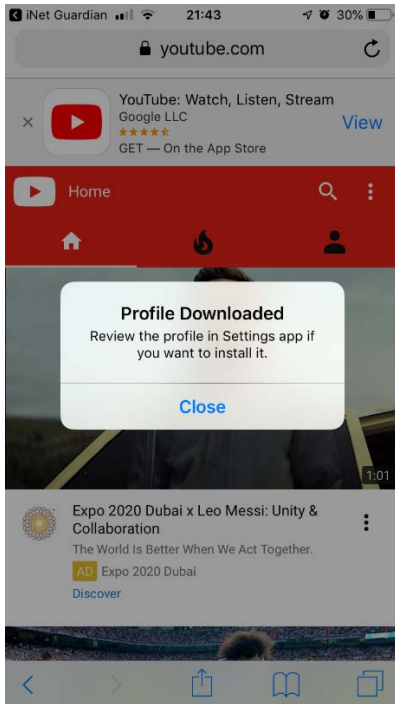

Choose a name for the device, by default this will be the user account name. Click on **Next**.

Read through instructions and then click **Next**

In order for the app to install it needs to download a configuration file and install some certificates. Click on **Allow**.

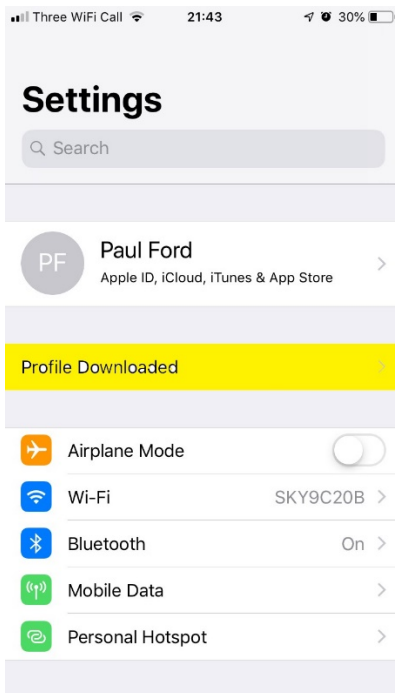

The profile has been downloaded and you will need to review the profile and install it. Click on **Close**.

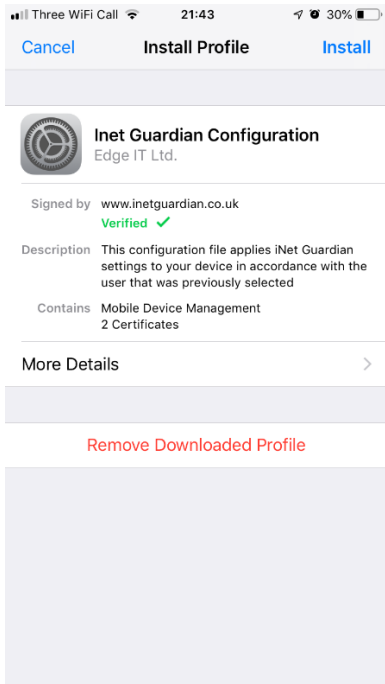

Click on the **Settings** icon,

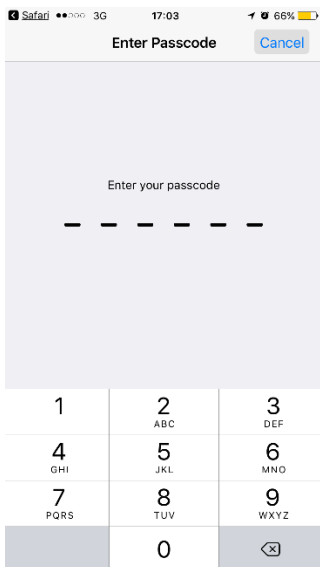

You will see **Profile Downloaded**

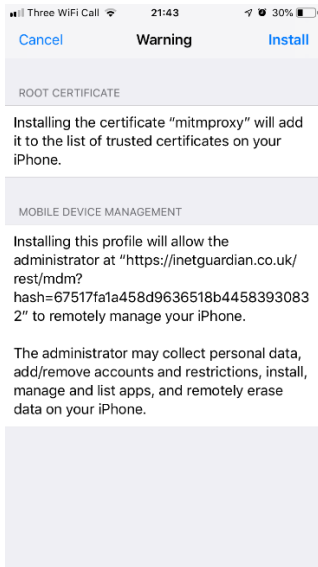

Click on **Profile Downloaded**

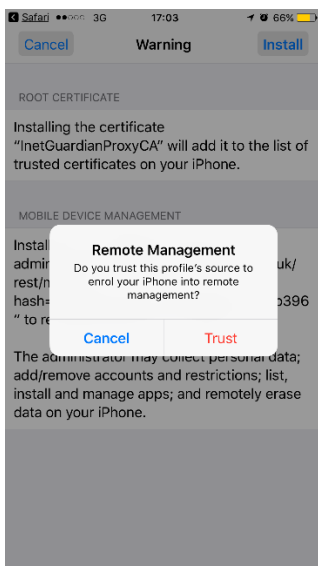

Click on **Install**

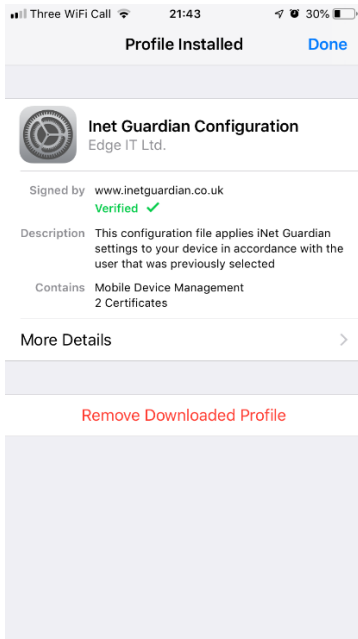

Enter the passcode used to unlock your device.

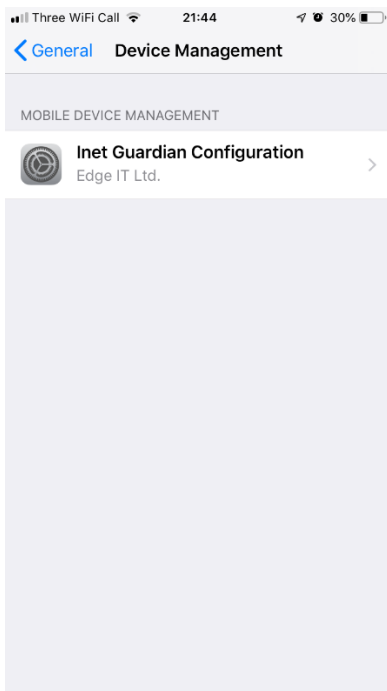

Click **Install** to allow the certificate to install.

Click **Trust** to install profile to the device.

When profile is installed click **Done** to complete installation. Device is now protected.

Double-click the Home button to exit Settings.

After a minute or two you should see the VPN icon appear in the iPhone Status Bar as shown in the picture below.

Please email support@inetguardian.co.uk if you have any questions or require any support in getting iNet Guardian configured and setup. We will be only to happy to help.
