

Internet On/Off Feature

Edge IT Ltd

Piecing Together the IT Puzzle

We have recently added a feature to the iNet Guardian service that allows you to immediately turn the Internet on or off for a particular user.

This can be useful if you want to enable or disable the Internet outside of the timings that you may have already placed on the device. For instance you have allowed the device to connect to the Internet between 10AM and 4PM but its 5PM and you want to enable the Internet without having to change the timings. To do this follow the steps below but also ensure that you set it back after the device has been used otherwise the setting will remain.

First log in to iNet Guardian dashboard

If you want to leave the Internet access disabled for a certain period of time then click **“leave it on until I disable it”** to set it to **OFF** and then choose a period of time for the Internet to be disabled from the **Time** drop-down box.

If you want to Enable Internet access then do exactly the same as above but choose **Enable** instead of Disable.

PLEASE NOTE: If you choose “Leave it on until I disable it” then you need to follow the steps below to set it back to default.

Log into the iNet Guardian dashboard.

Select **USERS** tab from menu bar

When in manage users, under the internet tab of user you wish to set back click on **Disable** or **Enable** and set Status to “**By rules**” this will then use the timings that have been setup for the user.

Name	Group	Policy	Status	Internet	PAC file
<input type="text"/>	<input type="text"/>	<input type="text"/>			
ipad	Group for ipad	Policy for ipad	Active	By rules	
test	Group for test	Policy for test	Inactive	By rules
